

Participants Needed for Research Study

This study:

Will compile community reentry experiences and opinions of people who have been in prison or jail and who have received mental health services while incarcerated or in the community. We wish to identify and make recommendations regarding services that make reentry most successful.

Your participation:

- Will take about 90 minutes.
- We will ask you questions about being incarcerated, mental health services, and reentry services.
- Participants will receive \$25 in cash.

To participate:

- You must be at least 18 years old.
- You must have re-entered the NYC community from jail and/or prison in the last ten years.
- You must have received mental health services while incarcerated and/or in the community. For purposes of the study “mental health services” can include treatment for substance abuse, but must also include treatment for another mental health condition as well (substance abuse treatment alone is outside the scope of this study).
